

Meritech, Inc. Announces Sale of its CleanTech® System to the Turlock Unified School District

Fully-Automated Handwashing and Compliance Monitoring System kills germs for up to six hours and increases employee handwashing by 300%

GOLDEN, Colo., Dec. 13, 2006 — Meritech, the leader in automated handwashing and sanitizing technology, announced today that the Turlock Unified School District is now using the CleanTech® 500EZ Automated Handwashing and Compliance Monitoring system. The school's cafeteria food service handlers are using the system to make handwashing quick and easy. The CleanTech system increases staff compliance for an effective and sanitary hand hygiene program.

"Handwashing and hygiene are top priorities for our school, and we felt that the Meritech system gave us an opportunity to increase our hygiene measures for our employees and to help better protect our students. This is a proactive, positive development for our team, and we are thrilled with the convenience and quickness of the Meritech system," said Scott Soiseth, Director of Food Services for The Turlock Unified School District. "We had ordered one for our main cafeteria and were so pleased that we ordered four more for our workers."

The touchless system performs a fully-automated ten-second wash, sanitize and rinse cycle. Using Meritech's proprietary Chlorhexidine Gluconate (CHG) sanitizing solution, the single cycle removes over 99.9% of pathogens and continues to kill germs for up to six hours. The FDA certified CHG-based sanitizer contains mild skin conditioners to improve skin health while removing dangerous pathogens. "Prior to the installation of the 500EZ, we had several worker compensation claims due to skin cracking and irritation caused by wearing gloves; claims are now non-existent," Soiseth added.

The system further boosts compliance by ensuring a pleasant, uniform handwash using high-pressure water jets that perform a consistent wash-and-sanitize cycle every time the machines are used.

About Meritech

Meritech, Inc., a division of Resurgent Health and Medical of Golden, Colo., is the leader in automated handwashing and sanitizing technology. For almost 20 years, its Cleantech® brand systems have been used worldwide in agriculture,

food processing, food service, cleanroom manufacturing and healthcare. CleanTech uses up to 75% less water than manual handwashing, discharges 75% less wastewater, and reduces waste in soap utilization - thus decreasing operating and labor costs. For more information, visit www.meritech.com.

About The Turlock Unified School District

The Turlock Unified School District began its initial school year on July 1, 2004. Prior to our unification we were composed of the separately governed, but commonly administered Turlock Elementary School District and Turlock Joint Union High School District. Our 726 teachers and 622 classified employees provide excellent learning opportunities to our 13,720 students. Our district includes one primary school, ten elementary sites, two junior high schools, two large comprehensive high schools and two small alternative high schools, and provides one of the largest adult school programs in California's Central Valley.
